3(27)(68)1 (1-1-98) General

3(27)(68)1.1 (1-1-98) Purpose (1) The codes herein are specified by the Corporate, Submission Processing and Customer Service Divisions (Information Systems Management) and apply to processing of all transactions affecting the Business Master File (BMF), Individual Master File (IMF), Employee Plans Master File (EPMF), Integrated Data Retrieval System (IDRS), and the Individual Retirement Account File (IRAF).

(2) All codes contained herein are explained and defined in the various projects to which they apply. This manual is a compilation of those codes to provide a ready reference for management and to assist in the understanding of reports and other outputs containing coded data. As a word of caution, it is noted that revisions to this manual may lag behind the updating of the various projects responsible for the application of the individual codes.

3(27)(68)1.2 (1-1-98) Scope This Section of IRM III, Chapter 27 for ADP System Codes, identifies the codes used and briefly explains what processing occurs where such information is pertinent.

3(27)(68)1.3 (1-1-98)
Resolving Procedural
and Computer Systems
Problems

(1) When discrepancies, problems, recommendations, etc. are surfaced, submit the information to National Office by the appropriate method indicated below. **NOTE:** Inappropriate forms, i.e. Form 5715 used to report IRM inconsistencies, will be returned without consideration.

(a) Use Form 5391, Procedures/Systems Change Request, to report a non-emergency problem, to request a change to IRM or Master File procedures or to report discrepancies between IRM's or systems. See IRM 3(31)(125)0, Procedures/Systems Change Request, for complete information on the preparation and routing of that form.

(b) Use Form 5715, Systems Production Evaluation Report to identify computer programming or operational problems which need immediate attention. If a problem on a particular account is being reported, include a TIF Edit with the background information. Refer to IRM 2770, Systems Production Evaluation Reports, for procedures to report such work stoppage problems.

(c) Use Form 1938, New or Revised Form/Envelope Request and Form 6294, Transmittal of Form Approval Requests of Form Management, to suggest changes to forms and letters. See IRM 1(17)00, Printing and Publications, for instructions to prepare and route these forms

(d) Use Treasury Form 64–50.1, Employee Suggestions, to submit ideas to improve processing, eliminate waste/duplicate effort or to improve taxpayer relations. Consult IRM 0400, Employee Performance and Utilization, for complete information.

(e) Use the Editorial Change Request Form when a change to the manner in which a procedure is presented without a change to the procedure being described and without a problem being identified is nec-

(2) Please note that since operational problems or defects are not being reported on the form the requests will not be controlled upon receipt nor will they require a written response.

3(27)(68)2.(10) (1-1-98) Zip Codes

Postal ZIP Codes established by the Postal Service are maintained in the Entity Section of the Master File as applicable and are used for mailing and sorting. These codes will not be included in this manual; however, PS Publication 65 "National ZIP Code Directory" contains a complete listing of ZIP Codes.

3(27)(68)2.(11) (1-1-98) Internal Revenue Service Center Codes The Internal Revenue Service Center Codes have replaced the District Office Codes as the Filing Location Code (first two digits) in the Document Locator Number. D.O. Codes are still used in IDRS and other district-initiated transaction DLNs. During heavy filing periods, D.O. Codes will be used as the FLC to handle overflow conditions but will not correspond to the actual filing location (e.g. a FLC of 01 will indicate ANSC but does not necessarily mean that the return came from the Augusta, Maine filing area). In addition, Document DLN's with foreign features (e.g. 1040NR, 1040 with Form 2555) will carry FLC code 66 or 98.

Identification Codes

3(27)(68)4.1 (1-1-98) General

- (1) Document Identification Codes are used primarily to control and identify the document being processed. The codes listed herein are part of the Document Locator Number. There are three basic DLN formats as shown below. Documents are blocked and filed by the DLN. The DLN identifies the type as well as the location of the document.

- 1 File Location Code (FLC)—(2 digits)—In most cases this will be a valid Service Center Code and will represent the service center which processed the transaction. Sometimes, however, this field will contain a valid District Office Code (these codes will have no relationship to where the taxpayer lives, but are simply stand-ins for their corresponding Service Center Codes). D.O. 41, 55, and 93 are reserved for Electronic Filed Returns. The following are exceptions to this rule and have a direct relationship with the taxpayer's address:
 - a -All DO 66 (Puerto Rico) input
 - b —All DO 98 Assistant Commissioner (International) input
 - c —All area office payments
- d —Most IDRS input through terminals located in district offices

e —All Non Master File items

For these types of input the FLC will either represent the taxpayer DO or the District Office of control (for certain IDRS transactions).

2 Deposit Tax Class Code—(1 digit).

3 Document Code (2 digits).

- 4 Control Date—(3 digits)—Denotes the numeric day of year of:
- a DEPOSIT DATE of remittances received with returns or payment documents.

b SATURDAY DATE (previous) when numbering noremittance returns and other documents.

- c SUNDAY DATE (previous) is used when numbering noremittance returns and documents after the available blocks of numbers (block number and serial number) for a District Office within the Saturday date has been exhausted.
- d TRANSFER DATE used when transferring credits into or out of the Master File and for dishonored check transactions on Form 2287 "Dishonored Check Posting Voucher".

e CURRENT DATE when not otherwise specified. If transaction contains a transaction amount, current date must agree with the

date of prejournalization.

- f DATE DEBIT IN TREASURY ACCOUNT from Part 3, Form 5504 or 5515 "Debit Voucher—Internal Revenue Collection" for dishonored check transactions processed on Part 3 (debit part), Form 2287. This date is entered on Form 5504 or 5515 by the Depository.
- g IDRS or RPS DATE—Denotes the numeric day of the year plus 400.
- 5 Block Number—(3 Digits): In addition to its use of providing a number for controlling input to the Master File and for filing documents, the block number may also be used to identify a particular type of adjustment or remittance, change a tax module Control DLN, cause a Debit or Credit Advice to be withheld, or for other purposes as shown below.
- 6 Serial Number—(2 digits): The maximum number of records within a block is 100. They are serially numbered from 00 to 99.
- 7 Year Digit—(1 digit)—generated year digit will be current year if Project 709 Control Date is less than current date, otherwise the prior year digit is generated.

(b) DOCUMENT LOCATOR NUMBER—Federal Tax Deposit Credits. Output documents show the DLN in the standard format, i.e. xxxxx-xxx-xxxx-x

EXCEPTION: Retention Register and Form 4303 Transcripts.

- 1 Service Center or File Location Code—(2 digits).
- 2 Tax Class—(1 digit)—1 through 9.
- 3 Document Code—(2 digits)—Doc. Code 97 applies to Federal Tax Deposit Credits.
- 4 FTD Conversion Date—(3 digits)—Generated numeric calendar day of the year on which Federal Tax Deposit Credits were converted to tape.
 - 5 "00"—Computer Generated.
 - "99"-Indicates an FTD "Rollover/Rollback" Condition.
- 6 Substitute Card Code—(1 digit)—Indicates whether or not a substitute Federal Tax Deposit Credit Card was prepared. (1—substitute)
- 7 Federal Reserve Bank Code—(2 digits) Generated. Identifies Federal Reserve Bank which received money from taxpayer.
 - 8 Year—(1 digit)—Units position of the year for the Conversion

Date explained in 4. above.

xxxx-xxxxxx00000 xxxx 1 23 4 5 6

- 1 Service Center or File Location Code (2 digits)
- 2 Tax Class (1 digit)
- 3 Document Code (always 97)
- 4 Service Center Code—Service Center that processed the FTD and has the microfilm on file (2 digits).
- 5 Cycle—The calendar week of the year in which the FTD was numbered, filmed, and processed in the Service Center (2 digits)
 - 600 expanded
- 7 Serial Number—The sequentially assigned serial number for that week's processing. Serves as the index number on microfilm (6 digits).

3(27)(68)4.2 (1-1-98) Tax Class The Tax Class along with the Document Code identifies the type of Form, Document or Return that posted to the Master File. See Document Codes.

(1) Tax Class is the third digit of the DLN and identifies the type of tax each transaction involves. Tax Class 9 does not identify a particular type of tax but permits various types of BMF taxes to be blocked together under certain conditions. Tax Class 0 identifies EPMF and IRAF processed documents and is not a true tax class. Tax Class 5 is used to control IRP documents on the NMF control system and Backup Withholding FTDs (F941). Tax Class 6 identifies NMF con-

trolled documents and is not a true tax class. Tax Class 6 is also used to control (F943) deposit activity.

(2) Doc. Code 79 is used by IDRS on various system generated transactions: 901, 902, 920, 141, 142, etc.

3(27)(68)4.5 (1-1-98) Control Date

(1) Service Centers number no-remittance returns using the preceding Saturday date as the control date and the block number series from 000–999. When the available block numbers for the preceding Saturday are exhausted, the preceding Sunday date is used as the control date for the overflow. (See IRM 3(10)(72)(0)) Service Centers will number remittance returns using the Julian date for the day of the week (Monday thru Friday) beginning with the lowest block number in the series each day. (See IRM 38(43)(0)) For IDRS terminal input transactions: Control date increased by 400, yielding dates between 401–766.

Computer Condition
Codes (excluding IMF)

These are assigned by return examiners or are machine generated. Computer programs for the processing and posting of tax return data are based upon the recognition of these codes within a designated field in the appropriate tape record formats. Presence of condition codes initiates actions as explained below:

3(27)(68)8.2 (1-1-98) Forms 1040, 1040A, 1040EZ, 1040PC

Code	Explanation
101	Based on information you reported, we refigured your tax using the filing status for a single person.
102	Based on information you reported, we refigured your tax using the filing status for married filing a joint return.
103	Based on information you reported, we refigured your tax using the filing status for married filing separate return.
104	Based on information you reported, we refigured your tax using the filing status for head of household.
105	Based on information you reported, we refigured your tax using the filing status for qualifying widow(er).
106	We can't allow the exemption for your child. Form 8332 or 2120 was either incomplete or not attached or you didn't check the pre-1985 agreement box on your return.
107	You must have a dependent child to file as a qualifying widow(er). Therefore, we refigured your tax using the filing status for a single person.
108	You didn't show the name of the person who qualifies you for head of household filing status. Therefore, we refigured your tax using the filing status for a single person.

Code	Explanation
109	We can't allow the exemption for your spouse with the filing status you used.
110	You can take the full exemption amount for a dependent who was born or
	died during the tax year.
111	You incorrectly totalled the number of exemptions you claimed,
112	You can't claim an exemption for yourself when you can be claimed as a dependent on another person's return.
113	Welfare payments, workmen's compensation, etc., aren't taxable. Therefore, we took that amount off the income section of your return.
114	You didn't include all the income shown on your Form(s) W-2, W-2G, or 1099 in the income section of your return.
115	You and/or your spouse shouldn't be listed as dependents. We decreased
116	the number of your exemptions accordingly. You figured your total taxable interest incorrectly or transferred the amount
117	from your interest schedule to your return incorrectly. You can file a joint return for the year of your spouse's death. If you claim
117	dependent children, you can use qualifying widow(er) filing status for the following two years.
118	You must deduct any repayment of prior year social security benefits as an itemized deduction on Schedule A.
119	You figured your total taxable dividend income incorrectly or transferred the amount from your dividend schedule to your return incorrectly.
121	You transferred the amount of your business income or loss incorrectly from
	Schedule C or C-EZ to the income section of your return.
122	You figured your profit or loss from business or profession on Schedule C or C–EZ incorrectly.
123	You figured your short-term gains or losses on Schedule D incorrectly.
124	You figured your long-term gains or losses on Schedule D incorrectly.

126	You didn't include the amount of capital gain distributions from Schedule B on either your Schedule D or page 1 of your return.
127	You didn't include the amount of capital gain distributions from Form 2439
400	on either Schedule D or on page 1 of your return.
128	You transferred your capital gain or loss incorrectly from Schedule D to the income section of your return.
129	You transferred your capital gain or loss incorrectly from Form 4797 to the income section of your return.
130	We disallowed your adjustment for your tax Deferred Savings Plan. Your Form W-2 wages already reflected this adjustment.
131	You transferred your income or loss incorrectly from Schedule E to the income section of your return.
132	You figured your supplemental income on Schedule E incorrectly.
133	You figured your farm income and expenses on Schedule F incorrectly.
134	You transferred your farm income or loss incorrectly from Schedule F to the income section of your return.
135	You can't subtract state income tax payments on page 1 of Form 1040. You
	should claim them as an itemized deduction on Schedule A. If you filed
	a Schedule A, we adjusted it accordingly. If you didn't file Schedule A, and
	your state tax was less than the standard deduction, we increased your
	adjusted gross income by the state tax amount you incorrectly subtracted.
	If you didn't file Schedule A, but your state tax was more than the standard
	deduction, we used your state tax amount as your total itemized deduction.
	If you have other itemized deductions in addition to state taxes, you should
400	file an amended return, Form 1040X, to reduce your tax.

	ductible contributions and figure the nontaxable part of your IRA (your IRA basis).
142	YOU AREN'T ALLOWED TO CLAIM AN IRA DEDUCTION UNLESS YOUR PARTICIPATION IN THE KEOGH, SIMPLE, OR SIMPLIFIED EMPLOY-EE PENSION PLAN (SEP) WAS CONSIDERED INACTIVE. TO FIND OUT IF YOU WERE AN ACTIVE OR INACTIVE PARTICIPANT IN THE KEOGH, SIMPLE, OR SEP, YOU CAN GET PUBLICATION 1602 BY CALLING 1-800-829-3676. IF YOU FIND YOU WEREN'T AN ACTIVE PARTICIPANT, WRITE "NOT AN ACTIVE PARTICIPANT-NOTICE 87-16" ON THIS NOTICE AND RETURN IT TO US AT THE ADDRESS SHOWN AT THE TOP OF THIS NOTICE. IF YOU FIND YOU WERE AN ACTIVE PARTICIPANT, YOU SHOULD FILE A FORM 8606 TO REPORT NONDEDUCTIBLE CONTRIBUTIONS AND FIGURE THE NONTAX-ABLE PART OF YOUR IRA (YOUR IRA BASIS).
143	You should claim employee business expenses as an itemized deduction on Schedule A. If your employer paid you for a vehicle, you must show the full fair rental value on Form 2106 and prorate that amount. If you itemized, we moved your expenses to Schedule A. If you didn't itemize, we disallowed your deduction and adjusted your tax accordingly.
144	You can't be claimed as a dependent on another person's return if you file a joint return and have a tax liability. Therefore, we increased your personal exemption.
145	You can't file as head of household if you can be claimed as a dependent on another person's return. We changed your filing status to single and refigured your tax accordingly.
146	We can't allow your adjustment to income for alimony paid. You didn't give us a Social Security Number for the person who received the alimony, as required.

149	You figured your Adjusted Gross Income on page 1 incorrectly.
150	You transferred the amount of your Adjusted Gross Income from page 1 to page 2 incorrectly.

166	Your Schedule A (Itemized Deductions) was either incomplete or not attached. We refigured your tax without itemized deductions.
167	You entered your earned income credit on your child care expenses form. We adjusted your child care credit using your correct earned income.
168	You reported that you can be claimed as a dependent on another person's return. In that case, your personal exemption is zero. Your standard deduction is either the minimum deduction amount or the amount of your earned income up to the basic standard deduction.
169	You entered your total standard deduction and personal exemption allow- ance incorrectly.
170	You reported that you can be claimed as a dependent on another person's return. In that case, your standard deduction is either the minimum deduction amount or the amount of your earned income up to the basic standard deduction.

3(27)(68)8.(25) (1-1-98) Spouse Indicator Codes These codes identify the affected taxpayer on a joint return when a credit is transferred between the IRA file and the IMF file (O-nonjoint primary, 1-joint primary, 2-joint secondary).

3(27)(68)8.(27) (1-1-98) Priority Codes

(1) DOC Code 54 Priority Codes

These codes must be used in order to post adjustments (Doc Code 47 or 54) to the Master File when certain module conditions exist. Failure to use the Priority Code when specified will cause the transactions to unpost, causing erroneous notices, refunding or billing especially in cases where multiple adjustments and/or credit transfers are being processed.

Code Action

- Use Priority Code 1 when adjusting tax with TC 29X and an unreversed TC 420, Examination Indicator, or TC 424 Examination Request is present. Failure to use the priority code will cause the adjustment to unpost (UPC 330 or 160) a TC 290 for zero amount without credit reference number 766 or 806. Changes will post without a priority code. Use also if both codes 1 and 8 are required to adjust an account.
- No longer required.
- 3 No longer required.
- Use with a TC 290 for .00 containing no other reference numbers to release a BMF offset Q- Freeze. Used by Statute employees only to release a -D Freeze.
- 5 Causes IMF or BMF MCC posting process to generate and post assessments (or abatements) of accrued, unrestricted FTP penalty and/or interest.
- 6 Used to release a math error freeze only.
- Use with adjustments in block 740–769 to have an unsubstantiated math error protest sent to Examination. Also, use with an adjustment in block 700–739 when the protest is substantiated and there is an unreversed TC 576 in the module.
- 8 Used with TC 29X/30X transactions to bypass UPC 158 and 180 (IMF) and UPC 328 (BMF) analysis on original input.
- 9 Used with TC 291 blocked 200–299 to bypass UPC 150 (IMF) and UPC 350 (BMF).

(2) Doc Code 47 Priority Codes

Valid priority code for AIMS command codes are 1, 2, 3 and 8 and are described below. Priority code 4 became effective 1–22–88. The definition for Examination (AIMS) priority codes are not necessarily the same as the priority codes for DP adjustments. This information on priority codes pertains to AIMS only (cc AMCLS). For information on priority codes to be used for DP adjustments, refer to Document 6209, ADP and IDRS Information.

- (a) Priority Code 1—is used to permit a TC30X to post when an amended or duplicate return freeze condition exists on the master file. Be sure the adjustment will not create a duplicate refund or assessment. Terminals will not accept closings when an amended or duplicate return freeze exists unless Priority Code 1 is present. The amended return should be in the case file.
- (b) Priority Code 4—is used to allow an Examination partial assessment to post to the master file without releasing the master file freeze condition on a module with an amended return freeze. Since priority code "4" may only be used for partial assessments, an AIMS

consistency check will ensure that this priority code is used, the blocking series is INN, 10X or 18X.

(c) Priority Code 5—causes IMF or BMF MCC posting process to generate and post assessments (or abatements) of accured, unrestricted FTP penalty and/or interest. May be used with TC 290 or TC 300 for any amount, and in combination with other transaction codes.

(d) Priority Code 8—is used with an Examination adjustment to bypass the unpostable conditions that occurs when the adjustment is within \$10.00 of a previously posted adjustment (UPC 158 or 328), the adjustment contains credit reference number 764 (Earned Income Credit) and there's a 764 in the module (UPC 180), or the adjustment contains credit reference number 806 or 807 and no TC17X when the module contains a significant net TC17X (UPC 158).

3(27)(68)8.(28) (1-1-98) IRAF Filing History Codes

These codes are found on the Master File beginning in 1975. Some codes apply to the earlier years and others have been added for subsequent years. The various codes that may be found range from 0–7 follows:

0 = NO IRA

1 = Primary spouse has IRA

2 = Secondary spouse has IRA

3 = Both have IRA

4 = IRA Notice issued

5 = IRA Notice issued to primary

6 = IRA Notice issued to secondary

7 = IRA Notice issued to both

3(27)(68)(10) (1-1-98) Error Resolution Codes

3(27)(68)(10).1 (1-1-98) Error Codes For Error Resolution Codes reference IRM 3(12)(30).

3(27)(68)(10).2 (1-1-98) Error Register Action Codes

These are entered in the Error Register. They indicate what action the computer must take to correct the error shown on the Error Regis-

Code	Description
0 ,	Computer accepts the taxpayer's computation and does not recompute the tax. This is usually applied to short year returns.
1	Computer computation is correct and is accepted. Used when the taxpayer has made an error on his/her return.
2	Delete a Reject Record or IRP Error Record.
3	Document is unprocessable and must be sent to the reject register.
4	Delete a section from the transaction on the Error Tape.
5	Add a section to the transaction on the Error Tape.
6	Correct a field(s) of the transaction on the Error Tape except any field used in Block Balancing.
7	Used to indicate that the data on the Error Register is correct and no action is necessary.
9	Re-reject a Reject Loop Record.

3(27)(68)(10).3 (1-1-96) ERS Command Codes

(1) SINON—Used to sign on to the computer. SINON is displayed but must be keyed onto the screen when signing on. The password should be entered and does not appear on the screen. The response will be your Entry Code.

(2) ŚINOF—Úsed to sign off of the computer. SINOF will be used by all terminal users, including ERS, GUF and IDRS. SINOF is never displayed, but must be keyed onto the screen when signing off. The response will be "Request Completed". SINOF must be used when leaving the terminal or at the end of a shift. SINOF is valid at any time.

(3) GTREC—Used to access the first error record in an ERŚ error block or to access a specific record in the Workable Suspense Inventory.

(4) CRECT—Used to enter a correction or a clear code.

(5) GTSEC—Used to access an undisplayed section of an ERS record.

(6) GTRECW—Used to recover an ERS data record that has already been worked. This Command Code can be used at any time on the same processing day. If an error is discovered on a subsequent day, the record must be corrected using Notice Review and Adjustment procedures.

(7) DLSEC—Used to delete a section from an ERS record.

(8) SSPND—Used with an ERS Action Code to place a record into Suspense status.

(9) NWDLN—Used to assign a renumber DLN on an ERS record.

(10) RJECT—Used to delete a record from ERS.

MFTRA—Used to request a transcript for a specific TIN. If input before a specified cutoff time, the data can be accessed the following day. A hardcopy transcript is received unless Output Type "D" is entered to request a display on the terminal.

3(27)(68)(10).4 (1-1-98) Martinsburg Computing Center Error File Code Register

- (1) The 2-digit codes generated at the MCC identify reject and error conditions discovered during input and output computer processing of the BMF and IMF. Codes written on Error Tape files provide the necessary explanations to facilitate analysis of discrepancies and to permit the initiation of necessary adjustment by the MCC or Service Centers. Requirements for maintenance of this Register appear in IRM 3(17)00 SC & MCC Accounting and Data Control, Chapter 709 SC Data Control (IRM 3(17)(30)0)
- (a) In addition to the explanation for each code, grouping of the codes as shown in sections below provide a method of categorizing the errors by type. The assignment of new Error File Codes must be

made within these groupings.

1 Codes 01-69—Identify errors that are not rejects.

2 Codes 70–97—Identify MCC only; they appear on records which the Control Unit has rejected from MCC processing. Reject codes are input on the DLN card used to reject the record.

3 Code 98—Identifies a "memo" type Error Record which remains in the System but is written out for information purposes.

4 Code 99—A newly discovered error condition not yet classi-

fied into one of the above groupings.

(b) These codes are applicable to all runs using an Error File. When a new error condition occurs in a run, determine whether one of the codes already assigned describe the new condition, if not:

1 Choose an open number to assign to the new error condition, using a number between 70–97 for MCC Rejects; between 01–69 for errors that are not rejects. Code 98 is used for "Memo" Error Records, 99 is used in each program for errors not yet classified.

2 Insure that the number chosen has not been assigned since

the last up-dating of this Register.

3 Coordinate assignment of the Error Code finally chosen within the Returns Processing and Accounting Division to insure the IMF and BMF use this code for the same Error Condition and to update Register.

4 Post the definition of the Error Code to the Register, noting whether the condition requires "debugging" action on the part of MCC, whether print-outs require special distribution, etc., and noting any other peculiar facts in the Remarks column.

(c) Error File Codes follow:

	Code 01 02 03	Explanation SSN or E.I. Number Field is zero but should contain a valid number. Output Record Amount should be greater than zero Erroneous Output Code
	04	Invalid Transaction or MFT Code
	05	Invalid District Office Code
	06	Invalid Region Code
	07	Invalid Location Code
	08	Invalid Tax Period

	16	Invalid Condition Code
	17	Invalid Transaction Date
	18	No matching record found. Indicates that an input record could not find a matching record based on the control (matching) fields used in the system, for example, no match on entity, or match on entity, no match MFT Code, etc.
1 10	20	Attempt to change or delete a previously deleted record.
	20 21	Records are out of required sequence.
	26	No transactions posted—an advice record, indicating that an advice was
	20	generated although no transaction bearing amounts, or, bearing amounts and Doc. Code 58, were posted in the Current Cycle.
	27	Overflow notice record.
	28	Reserved.
	29	Reserved.

	35	Invalid Employment Code
	40	Invalid Filing Requirement Code
	41	Spouse's SSN all Zeros
	42	Fiscal month invalid
	69	ZIP code Mismatch

(d) The following series of codes and explanations relate to Reject items only i.e., they appear on records which the control unit has determined should be rejected from MCC processing. The code will be input on the DLN Card used to reject the record.

Code Explanation

70 Account transfer in, sum of detail transactions does not equal 370 amount.

Code	Explanation
71	Attempt to delete an entity for which an El change was made within 2 previous cycles.
72	Input transaction does not meet minimum word length for SC input.
73	Transaction, if posted, would cause an out-of-balance condition.
74	Excessive number of input transactions for one tax account; causes tax mod- ule overflow.
78	Invalid Tax Period
80	Unpostable Correction Rejected

3(27)(68)(12) (1-1-98) Transaction Codes

3(27)(68)(12).1 (1-1-98) General

Transaction Codes (TC) consist of three digits, are used to identify a transaction being processed and to maintain a history of actions posted to a taxpayer's account on the Master File. Every transaction processed by ADP must contain a Transaction Code to maintain Accounting Controls of debits and credits, to cause the computer at the MCC to post the transaction on the Master File, to permit compilation of reports, and identify the transaction when a transcript is extracted from the Master File. IRAF: Many BMF and IMF Transaction Codes will not be used for the IRAF. Also, the definitions of several Transaction Codes are necessarily changed since there will be no offsetting or computer generated credit interest. In addition all refunds will be scheduled manually with the refunds posted to the IRAF using TC 840.

3(27)(68)(12).2 (1-1-98) Prejournalized Versus Post-Journalized

All transactions containing accounting data are either Prejournalized or Post-Journalized. These are specified where applicable as "PJ" (Prejournalized) or "NPJ" (Post-Journalized). Prejournalized transactions are recorded in the proper journal prior to MCC processing whereas Post-journalized transactions are recorded after MCC processing from the Service Center Recap of Assessments, Abatements and other Post-Journalized Transactions.

3(27)(68)(12).3 (1-1-98) Structure

(1) The first two digits of the Transaction Code identify the basic transaction. The third digit (units position) is called the reversal code.

(2) ABBR & TITLE is the standard abbreviation shown on printed outputs such as "Document Index and Files", MCC computer generated "Transcripts", and "TDA's"

(3) Transaction Codes identified as "Generated Transaction" under the column headed "DOCUMENT CODE" are used in National Office programs to facilitate the execution of various analysis and output computer transactions. They cannot be used as input transactions. They are incorporated here so as to provide a single reference for all Transaction Codes.

(4) Programmer Reversal Codes are used as follows:

(5) REVERSAL CODE 3 (IMF only)

(a) Payment or penalty transaction codes with reversal code "3" which are NOT LISTED in this section are actually reversal code "0" transactions. For programming purposes, the "0" has been converted to "3" to indicate the original payment or penalty transaction (or portion of it) which has been reversed. However, for account analysis purposes, consider the "3" reversal code as "0". (IMF) Example:

Explanation Tax module prior to bad check:	Date 6/15/68	TC TC	Debit	Credit \$500
Same tax module after bad che (TC 671) posts:	ck6/15/68	670 TC 673		\$500
(10 only produce		6/15/ 68	TC 671	\$500
		4/15/ 68	TC 280	\$12
Same tax module after reversal bad check penalty (TC 281) pos		TC 673		\$500
		6/15/ 68	TC 671	\$500
4		4/15/	TC	\$12
		68 4/15/	283 TC	
*		68	281	

(b) This technique is also used for some non-money transactions to indicate the original transaction has been reversed. Example:

Explanation	TC	Date
Tax module prior to new Assessment Statute	TC	6/15/69
Expiration transaction:	560	li .
Same tax module after posting new Assessment	TC	6/15/69
Statute Expiration transaction:	563	l .
ì	TC	6/15/69
e g s	560	1

3(27)(68)(12).4 (1-1-98) **Current Transaction** Codes

(1) All transaction codes currently in use are listed below.

(a) Abbreviations used under the heading FILE are as follows: IMF "I", BMF "B", EPMF "E", IRAF "A" and PMF "P".

- b The MF 47 hold is subject to an age criterion. If, after 15 weeks, the taxpayer is not full paid and there has been no reversal, the hold is released. There will then be an attempt to issue a TDA. IDRS applies the same age criterion and also includes aging the most recently opened or closed control base, for its 47 status. The age criterion is not used for CC 94, 95, 98, 99 or modules in status 22 when hold was established.
- (g) If the taxpayer reaches full-paid condition, all holds and freezes are lifted. If not, only special reversal transactions release them.

3(27)(68)(12).(15) (1-1-96) Transaction Codes (IDRS) (1) The transactions listed here are either unique to IDRS (they do not post to a Master File), or when used in IDRS, they have a slightly different meaning than when used outside of the IDRS.

(a) RESEQUENCING TRANSACTION CODES—These differ slightly from those for the corresponding Master File transactions. The TC 003 and 026 are generated during IDRS processing, therefore they are not the actual MF transactions, but do reflect MF status.

1 003—BMF Partial Merge—Appears at the old EIN and contains a cross-reference number. It indicates that a merge was attempted but was not able to become a complete merge because of modules in both involved accounts which are for the same MFT and tax period. The TC 003 will appear, in "DI" pending status, in the entity module.

2 004—BMF Partial Merge—Appears at the new EIN and contains a cross reference TIN. The TC 004 will appear in "DI" pending status in the entity.

3(27)(68)(14).1 (1-1-98) General The codes listed in this section are obsolete in that they are no longer input into the ADP System. They are listed here because they may appear on transcripts and other documents which record a history of transactions posted to a taxpayer's account. Note that this is not a complete list of every code that has ever been used. When meanings of obsolete codes are rarely needed, they are not listed; when the usefulness of listed codes is negligible, they are removed.

(b) Case Status Codes—the following status codes are used when controlling a case.

1 S—Suspense, a workable case under control to a functional area or, occasionally, to an individual employee. The case is experiencing a temporary delay in processing (e.g. awaiting microfilm research, in-house documents etc.) All cases assigned under Category IRP—must be controlled initially under this status. They may, however, be updated via ACTON to any other valid status.

2 A—Assigned, an active case under control to a functional area or, more commonly, to an individual employee. The case is in

the process of being worked.

3 B—Background, a non-workable case under control to a functional area or to an individual employee. The case is in a monitoring mode and, for aging purposes, is treated the same as status M. Control bases in status B do not prohibit on-line transaction input to

that module by the assignee of a control base in status S, A, or M. All cases assigned to Examination Division employees will be in this status. This restriction will not prevent normal closing of cases.

4 M—Other, a non-workable case controlled to a functional area or to an individual employee. The case is experiencing long-term delay in processing which is beyond the assignee's control, frequently due to third-party contact (e.g. the taxpayer, another service center, SSA, etc.)

5 C—Closed, a case on which all possible resolution action has

been taken.

6 Z—Used to close (change to C status) IRP cases. Valid only on adjustment control header card record and only for IRP cases.

(c) Activity Codes—Activity codes are used to keep an up-to-date history with each case. They are used when controlling a case, or when describing action taken without establishing or affecting a control. (Any service center or district office approved 1 to 10 character codes may be used in the activity code field. Only activity codes generated by adjustment control card input or on-line transaction input, or activity codes specified in ADP Handbooks, are listed below.)

1 ADJUSTMENT—Accounts Maintenance case sent to Adjust-

ments for resolution action.

- 2 AMFOLLUPn—Accounts Maintenance follow-up number n. 3 CASETOCn—Related case closed for association with Cn case.
- 4 CREDTRANS—Credit transferred by DRT24 or DRT48 input; generated when case control was not previously established.
- 5 CRTOSPnnnn—Credit transferred to spouse's tax period. 6 CnERRCLSD-Control base number n was closed prematurely. Current control base is a continuation of Cn.

7 DOnn2990—Miscellaneous Investigation (Form 2990) initiat-

ed to district office nn, Field Branch.

- 8 ENMODENTRL—Case controlled on ENMOD—overflow on TXMOD

3(27)(68)(24) (1-1-98) Miscellaneous Codes (IDRS)

3(27)(68)(24).1 (1-1-98) Pending Transaction Identification Codes

- (1) AP—A pending tax module transaction prior to assignment of a complete DLN. Indicates that transactions subject to Quality Review have not yet cleared review if selected. For transactions not subject to Quality Review or that have cleared review, the transaction has not yet been assigned a DLN. See transaction IgDg codes "PN" and "DQ" below.
 - (2) EP-Same as (a) above except a pending entity transaction.

(3) Reserved.

- (4) PN—A pending transaction that has passed all IDRS checks, and has a complete DLN. If addressed to File I/B/A or E, this transaction will be included on the Master File transaction tape.
- (5) Unnn—A new unpostable transaction, nnn—the numeric unpostable code.
- (6) DU—Most commonly, a deleted unpostable transaction. Specifically, DU applies to the following kinds of transactions:

(a) Unpostable transactions nullified with Action Code 2 (voided).

- (b) A Unnn or NU transaction on the TIF that did not match an incoming Daily Update transaction on money amount. The transaction on the TIF changes to DU and the incoming transaction is separately appended to the file.
- (c) A Unnn or NU transaction appended to the entity did not match an incoming transaction in the Daily Update on size (transaction length). The transaction on the TIF changes to DU and the incoming transaction is separately appended to the file.
- (d) A Unnn or NU transaction was changed to DU by the optional appending routine in the weekend update run. The age factor used varies with each individual running of the age-pending routine.
- (7) DC—A transaction deleted by Service Center Reject processing.

(8) DN—A transaction deleted by IDRS batch processing. This pending transaction status occurs under the following conditions:

(a) A transaction on the TIF other than a Unnn, NU or TP did not match an incoming IDRS daily update transaction on money amount. The transaction on the TIF changes to DN and the input transaction is separately appended.

(b) An entity transaction on the TIF other than a Unnn or NU failed to match an incoming IDRS daily update transaction on size (transaction length). The transaction on the TIF changes to DN and the incoming transaction is appended separately.

(9) NU—A nullified unpostable transaction nullified with Action Code 1.

(10) CU—A corrected unpostable transaction.

(11) RJ—A reject transaction. RJ transactions are always appended to the entity on IDRS. They are displayed by CC ENMOD and CC TXMOD if the MFT, Plan Number and Tax Period are for the displayed tax module.

(12) Rnnn or RS-

(a) A resequence transaction. The transaction was extracted from the MF resequence file at MCC.

(b) All TC 904's when first appended.

(c) If a TC 904 showing the tax module has been removed to the latest retention register appends to the module, any PN transactions already on the module will be changed to RS and have their transaction cycles increased by 5.

(13) DP—A transaction deleted by one of the following conditions:

(a) CC DELET was used to delete the transaction.

(b) A TP transaction on the TIF failed to match an incoming IDRS daily update transaction on transaction money amount. The transaction on the TIF changes to DP and the incoming transaction is appended separately.

(c) A TP transaction has been on the TIF for 4 cycles. The week-

end update run changes it to DP.

(d) An AP, EP, or DI transaction was changed to DP by the optional age-pending routine in the weekend update. The age factor used varies with each individual running of the age-pending routine.

(14) DQ—Transaction deleted by Quality Review.

(15) TP—A payment input to IDRS from RPS (Remittance Processing System), not yet included on the Master File transaction tape.

- (16) EDI—A DI transaction appended to the entity is identified as "EDI" when it is displayed with a tax module (CC's TXMOD). Limited to TC's 003, 004, 008 and 026.
- (17) ERS—An RS transaction appended to the entity is identified as ERS when it is displayed with a tax module (CC TXMOD). Limited to TC's 903 and 904.

(18) DW—A PN, RS or CU transaction was changed to DW by the optional age-pending routine in the weekend update. The age factor used varies with each individual running of the age-pending routine.

(19) DJ—A PN, RS or CU transaction was on the TIF, the Name Control Mismatch Indicator in the transaction was turned on, and the cycle for which the transaction should have posted has gone by. The transaction is changed to a DJ performed for IMF, BMF, IRAF only.

(b) A PN, RS or CU TC 420, 424, 170, 180, 234, or 460 was on the TIF and the cycle it should have posted has gone by. The transaction is changed to a DJ by normal weekly TIF update process.

3(27)(68)(24).2 (1-1-98) Freeze Codes These codes appear on tax modules displayed from CC TXMOD, CC SUMRY and on IDRS transcripts. Some freeze codes have two definitions. Thus the position in which the letters appear, left or right, determines the freeze condition. Up to four freeze codes from the "left-hand" group and up to four freeze codes from the "right-hand" group can be displayed. Freeze Codes and conditions are defined in this LEM and in IRM 36(66)0.

3(27)(68)(25) (1-1-98) Debtor Master File

3(27)(68)(25).1 (1-1-98) General

The Debtor Master File (DMF) was created by the Debt Reduction Act of 1984. This Act allows government agencies to identify to IRS individuals that have liability to that agency. Through contractual agreement, IRS offsets the taxpayer's refund amount to the extent possible by the amount of liability certified by an outside agency. Taxpayers are notified of the refund adjustment and the appropriate agency is credited with the collection. DMF Agency Codes will be printed with TC 896 which debits the IMF and transfers the overpayment to the DMF for crediting to the corresponding agency. Offsets from BMF, Form 1120 will begin in Cycle 9505.

(3) EOMF Unpostable Code 03

(a) Applies to all Doc. Codes except 36 and 37 and indicates that the EIN of the input record matched an EOMF EIN but the Name Control/Check Digit of the input record did not match the EOMF Name Control or Check Digit. The first 33 characters of the EOMF name are included in the unpostable record.

(6) EOMF Unpostable Code 06

- (a) Limited to returns (990 series), and Form 5227 (old 1041PF which is actually a schedule to Form 1041 but is treated as a return for the EOMF) (transaction codes involved are 955, 983 and 990–993). The entity to which the unpostable return was addressed contains a return of the type and year identified to those of the unpostable return, neither of which contains Condition Code "G". (To be postable the second return must be coded differently from the first).
- (7) EOMF Unpostable Code 07
 (a) A return attempts to post to an account containing filing requirements other than that of the input return.

(8) EOMF UNPOSTABLE CODE 08

- (a) A return attempts to post and mismatches on Tax Period.

(a) TC 624 attempts to post and the first account has been rendered inactive but when the computer attempted to enter the first account's EIN into the Cross-Reference EIN field of the second, the Name Control was found incompatible (the Name Control of the second account is not input as part of the TC 624; rather the computer used the Name Control of the first account). The first 39 characters of the name of the second account are included in the unpostable record.

(11) EOMF UNPOSTABLE CODE 11

- (a) A TC 625 attempts to post and the first account has been rendered inactive but when the computer attempted to establish a second account under the EIN shown in Part 4 of Form 3935 (also the EIN contained in the unpostable record), it found an account already present under the EIN.
